

Essentials

Lifting limbs into bed should not be a passive patient task. The Medco Technology Limb Lifter allows the patient to become a more active participant in this patient mobilization exercise. Functional as a double or single leg lifter, limb sling and rehabilitation tool, the Limb Lifter bridges some of the gaps between equipment function and patient mobilization needs.

Limb Lifter/Limb Sling

Limb Lifter Design

- Gentle against the skin
- Easy to apply for both caregiver and patient
- Comfortable arm support promotes use with patients who are weak or have limited range of motion
- Laddering for easy grip
- Functions as limb sling for both upper and lower extremities

Limb Sling Design

- Comfortable, breathable fabric and padded design provides support without excessive pressure
- Contouring fabric adjusts to different body shapes and for angles needed during wound and skin care
- Designed for use with most overhead and floor lifts
